

3 Simple Steps:

Benefits:

- All your parts are stored in single repository that can be easily searched
- Part repositories easily maintained using CADFind's unique 'one click' process
- Designers can check for suitable existing parts before they design new ones
- Downstream cost savings from reuse of tooling, materials, designs and economies of scale
- Prevents design duplication & helps achieve standardisation
- Faster creation of process plans and quotations by modification of existing ones for similar parts
